

Gauge/Instrument Snubber

Autoclave Engineers gauges snubbers are offered for use in medium, and high pressure flow systems. Gauge/instrument snubbers protect components from pressure surges, pulsation, and shock in systems up to pressures of 60,000 psi (4137 bar).

Gauge/Instrument Snubber : ▶ Accessories
Pressure surge protection

FEATURES

- Protection without compromising accuracy
- Available in 1/4" and 3/8" medium and high pressure connection
- 316 stainless steel construction
- Female to female, male to female, and male to male connections

BENEFITS

This unique snubber design provides superior instrument protection while

not compromising instrument accuracy or reaction time.
