

### Prebulged Rupture Disc

Autoclave Engineers offers three styles of rupture discs to allow maximum flow at pressures. Rupture discs are available in different materials and burst ratings as specials.

#### **Prebulged Rupture Disc:** ▶ Accessories

Economical and Dependable Safety Relief when used with Universal Safety Heads to 110,000 psi (7584 bar).

### FEATURES

- Available in three styles, 3/16"F, 1/4"A, and 1/2"F
- Standard material is Inconel
- Pressure ranges from 485 psi (33 bar) to 75,260 psi (5189 bar)
- Special discs to 110,000 psi (7584 bar)
- Optional materials available
- Optional burst ratings and burst tolerances available

### BENEFITS

Rupture discs are used in Autoclave safety heads assemblies as an economical replaceable relief device to guard against system over-pressure. Rupture discs ease of replacement and the customers ability to change discs as needed for system pressure variations make these an excellent choice.
