

ANTI-VIBRATION COLLET GLAND ASSEMBLY

Since 1945 Autoclave Engineers has designed and built premium quality valves, fittings and tubing. Autoclave's medium pressure anti-vibration collet and gland assemblies range in size from 1/4" to 1" tube size. Used for extreme conditions of vibrations and/or shock in tubing systems, such as locating valves or fittings on an unsupported line near a compressor.

Anti-Vibration Collet Gland Assembly:

► Medium Pressure • Fittings and Tubing

MEDIUM PRESSURE to 20,000 psi (1379 bar)
Anti-Vibration Collet and Gland KCBGLX Series

FEATURES

- Increased tubing life
- tapered slotted collet
- Molybdenum disulfide-coated gland nut and collet body to prevent galling.
- Operating temperatures from -423°F (-252°C) to 1200°F (649°C).
- Coned-and-threaded connection
- Tubing sizes are 1/4", 3/8", 9/16", 3/4", and 1".

BENEFITS

Autoclave's medium pressure anti-vibration collet and gland assemblies are used on components for the chemical/petrochemical, research, and oil and gas industries and waterblast markets.
